About us

GREEN INDIA EQUIPMENTS PRIVATE LIMITED

Empowering Agriculture Through Innovation, Reliability & Performance

About Green India Equipments :

Green India Equipments Private Limited, established in 2010, is a leading agricultural machinery company dedicated to advancing modern farming through innovative, efficient, and dependable mechanization solutions.

With a strong commitment to Indian agriculture, we have spent over a decade supporting farmers, agri-entrepreneurs, and rural businesses by providing machinery that enhances productivity, reduces labour dependency, and improves overall operational efficiency.

At Green India, we believe that agricultural mechanization is not just about machines, but about empowering people and strengthening the future of farming. Our solutions are designed to address the evolving challenges faced by the agricultural sector, enabling customers to achieve better profitability, and sustainable growth.

Backed by industry expertise, technical knowledge, and a customer-centric approach, we continuously strive to deliver products that combine performance, durability, and ease of operation. Every machine we offer is developed with a focus on real-world farming conditions, ensuring reliability throughout every season.

Beyond manufacturing and supplying agricultural equipment, we are committed to building long-term relationships with our customers through responsive after-sales support, timely spare parts availability, and dedicated service assistance.

Today, Green India Equipments Private Limited stands as a trusted partner in agricultural mechanization, helping shape a smarter, more productive, and sustainable future for agriculture.

GODAVARI 360 – Paddy Harvester

Powering Every Harvest

The Green India Harvester - Godavari 360 is engineered for fast, efficient, and reliable harvesting. Powered by a robust 75 HP Quanchai engine, it delivers excellent field performance, reduced grain loss, lower operating costs, and superior operator comfort for modern farming.

Salient Features :

- Large grain tank for fewer unloading stops
- Wide cutting platform for faster coverage
- High-capacity threshing system
- Efficient grain cleaning system
- Adjustable cutting height
- Strong transmission for reliable field performance.
- Excellent performance in wet and dry field conditions.

High Capacity Multicrop Threshers Series

One Technology. Multiple Solutions.

All Green India High Capacity Multicrop Thresher models are designed for superior performance, high productivity and reliable operation across multiple crops.

Every model shares the same proven threshing technology while offering different feeding systems to suit various harvesting requirements.

Common Features Across All Models

Suitable for 16+ crops with crop-specific accessories

PTO operated with 40 HP & above tractors

Maize threshing without removing the cob cover

Low grain damage. Suitable for seed purposes

Heavy-duty construction

Safe operation & easy maintenance

Government Tested & Certified

TESTED & CERTIFIED

By a Government of India approved institution under the Department of Agriculture.

High Capacity Multicrop Threshers

Product Features:

- Maize, Paddy, Sunflower, Wet Groundnut, Dry Groundnut crops can be threshed in a Single machine with crops specific accessories.
- Can be coupled using PTO with all types of tractors with Minimum of 40HP.
- Threshing and Cleaning Efficiency not less than 98 percentage.

High Capacity Multicrop Threshers

Major Crops :

Maize, Wet Groundnut, Dry Groundnut, Paddy, Sunflower

Threshing Output Capacity

Crops Name	Output Capacity
Maize	5500- 6000 kg/h
Groundnut (Wet)	2000 - 2200 kg/h
Groundnut (Dry)	1500 - 1900 kg/h

Maize

Paddy

Sun Flower

Groundnut (Wet)

Groundnut (Dry)

High Capacity Multicrop Threshers

Product Features:

- Maize, Paddy, Sunflower, Coriander, Wet Groundnut, Dry Groundnut crops can be threshed in a Single machine with crops specific accessories.
- Can be coupled using PTO with all types of tractors with Minimum of 40HP.
- Threshing and Cleaning Efficiency not less than 98 percentage.

High Capacity Multicrop Threshers

with Double Feeder

Key Advantages :

- Double Feeder enables faster crop feeding
- Higher hourly productivity
- Ideal for commercial threshing

High Capacity Multicrop Threshers

with Inlet & Outlet Conveyor

Key Advantages :

- Inlet & Outlet Conveyor for continuous feeding & discharge
- Reduced manual handling
- Higher operational efficiency

Major Crops :

Maize, Paddy, Sunflower, Coriander, Wet Groundnut, Dry Groundnut

Maize

Paddy

Sun Flower

Coriander

Groundnut (Wet)

Groundnut (Dry)

Threshing Output Capacity

S.No.	Crops	Capacity*/ Hour
1	Maize	5500 - 6000 kg/h
2	Paddy	3000 - 3500 kg/h
3	Sunflower	1000 - 1500 kg/h
4	Coriander	750 - 850 kg/h
5	Groundnut (Wet)	5500 - 6000 kg/h
6	Groundnut (Dry)	5500 - 6000 kg/h

GREEN 245

MAIZE SHELLER CUM DEHUSKER

With Integrated Elevator & Conveyor

Performance	
Input Capacity	4,242 kg/h
Output Capacity	3,390 kg/h

GREEN 245 – MAIZE SHELLER CUM DEHUSKER

With Integrated Elevator & Conveyor

Salient Features :

- The Green 245 is a specialized tractor-operated machine designed exclusively for maize. It performs both shelling and dehusking in a single operation, eliminating the need to remove the cob cover before threshing.
- Powered by the PTO of tractors with 40 HP and above, the Green 245 ensures efficient operation while minimizing grain damage. The machine preserves the grain tips, making the output suitable for seed purposes.
- Tested and certified by a Government of India approved institution under the Department of Agriculture.

*Capacity may vary depending on crop variety, moisture content and field conditions.
